QUICK SETUP GUIDE

SOFTRON
record stream play

What's in the box ?

- The M|4e (Sonnet Thunderbolt expansion chassis + Deltacast DELTA-12G-elp-h 4c card)
- 1 x USB dongle (with the licenses for the 8 channels of MovieRecorder)
- 9 x BNC Female to Micro BNC (HD-BNC) Cable (15 cm)
- 1 x Thunderbolt cable (1,5 m)
- 1 x Power Adapter and Cord
- 1 x Full-Height bracket (if you need to use the card in a regular PCIe slot)

Connect the M|4e to your computer

To start using the M|4e, unpack it and connect it to:

- a power outlet
- your computer using the Thunderbolt cable

On your computer

- Connect the USB dongle (the small green light should light up)
- Download MovieRecorder (https://softron.tv/support/downloads)
- Download and install the drivers for the Deltacast card (link available on the downloads page of our website - requires to restart your computer)

Connection Diagram

The M|4e has nine Micro BNC (HD-BNC) connectors, with the following mapping. The Ref./LTC connector can easily be identified as it's slightly apart and with a golden finish..

Start MovieRecorder

You can find additional information on how to use MovieRecorder on our website. At the bottom of each product page, you can find the "Resources" section. Also the Knowledge Base of our support desk can provide a lot of useful information:
https://softron.zendesk.com/

Add options or licenses to the dongle

If you need to add options to MovieRecorder, or additional licenses, you can order them and we'll send you by email an upgrader for your dongle. Dongles can hold up to 20 licenses, so if you order an additional license, we can also send an upgrader for your dongle.
